The Grand Opening of HTP’s New Training Center

FOR IMMEDIATE RELEASE

New Bedford, MA, January 8, 2016 – HTP will be hosting a grand opening celebration of their new training center on February 9th and 10th from 12:00 p.m. to 5:00 p.m. All media outlets, contractors, and HTP representatives are welcome to attend. Refreshments will be served throughout both days.

This new facility was completed in early January with the hard work and planning of HTP’s Field Technical Manager, Chris Bernier and Technical Field Trainer, Brent Brehant, along with several others. A class schedule has been created and is available on HTP’s website. This schedule allows people to register for the classes online and gives the option for hotel accommodations.

HTP’s Training Center is 2,600 square feet and will consist of both classroom and lab environments. All the classes are hands on and will be using supplied laptops, combustion analyzers, multimeters, manometers, and hand tools. Live hydronic and hot water heating products will be on display while allowing for troubleshooting sessions, composition testing, and more. Classes will be taught by Brent Brehant and/or Chris Bernier.
If you will be unable to attend the grand opening, but would still like a tour of the new facility, please contact Chris Bernier.
