316L Stainless Steel Tank
Eliminates the need for anode rods

Advantage Heat Exchanger
Extremely durable enhanced corrugated surface: 316L stainless steel heat exchanger boasts excellent heat transfer properties, resists corrosion and offers extremely low pressure drop

High Performance
Can generate over 50% more hot water than many water heaters of similar size

Low Energy Costs
When used in conjunction with an HTP high efficiency boiler, operating costs decrease even further

Minimal Heat Loss
Thanks to 2” thick, water blown foam insulation

Virtually Maintenance Free

Top Connections: Inlet, Outlet and Auxiliary Ports
Auxiliary port for the recirculation line increases overall efficiency by eliminating short cycling of the connected boiler

SuperStor Number 1 Brand
HTP sells more indirects than anyone else in the country!

www.htproducts.com
High output corrugated surface 316L Stainless Steel heat exchanger provides maximum efficiency

316L Stainless Steel heat exchanger provides maximum efficiency

Auxiliary dip tube for the recirculation line increases overall efficiency by only circulating water from the top portion of the tank

Environmentally safe, CFC free water blown, 2” thick foam insulation allows less than ½ degree F heat loss per hour

Surface mounted thermostat for highly accurate temperature control

316L Stainless steel tank for high temperatures & corrosion resistance

Auxiliary port
Inlet port
EASY electrical connections for the thermostat
Outlet port

1” FNPT boiler in

1” FNPT boiler out

Drain valve port

A Closer Look!
Why Choose A Stainless Steel Tank? Because They Are Built To Last!

The Advantages
Stainless Steel vs. Glass-Lined

- HTP’s 80 GAL. Tank 157.5 LBS.
- Top Competitor’s 80 GAL. Tank 233 LBS.

Eliminates Scale Build-up on HX
Prolongs Tank Life
No Need for Anode Rods
Light Weight Construction

NO Anode Rods Needed!
All coated tanks require anodes to delay inevitable corrosion and tank failure. The average commercial water heater lasts about 6 years. The SuperStor Pro stainless steel tank will outlast any coated steel tank in the market.

*DOE TEST METHOD BASED ON 90°F TEMPERATURE RISE, 50°F / 140°F W/BOILER WATER AT 180°F NOTE: TANK RECOVERY FROM COLD START WILL BE BETWEEN 10-13 MINUTES WHEN SIZED WITH CORRECT FLOW RATE, BOILER SIZE AND PRESSURE DROP RATINGS FROM LIST IN ABOVE CHART.
CONTINUOUS FLOW RATING CALCULATION: FIRST HOUR RATING - (75 * GALLON CAPACITY) = CONTINUOUS FLOW RATING

10 Year Limited Warranty

Since 1976, HTP has produced more stainless steel tanks in the USA than any other company in the industry.
